

# INTER SER' BACK-WASH STATION

ASSOCIATO

ACIMAC

MEMBER

SPECIFIC MACHINE FOR THE ENGOBING OF THE BOTTOM PART OF TILES.

TOGETHER WITH ROLLERPRESS, SILICON PIPE LASER ENGRAVED, INTER SER' BACK-WASH STATION ALLOWS TO EASILY APPLY THE REFRACTORY ENGOBE IN AN ACCURATE AND UNIFORM WAY.

IT IMPROVES PRODUCTION PROCESS, INCREASES PLANT EFFICIENCY AND LOWER COSTS.

- Uniform and accurate engobe application with benefits of planarity or deformation visible at refelection;
- Flexible and elastic, adjustable to tiles' curvature: it allows to print evenly also on tiles highly convex or concave;
- Possibility to print logos or "Made in" writing using laser engraving;
- Longer state of kiln rollers cleanliness: the cleaning stops are getting fewer and it is possible to plan them in advance, synchronized with others line's stop activities. Consequent increase of monthly hours at full kiln, reduction of fixed and maintenance costs per square meter;
- Improved order and advancement of pieces inside the kiln as well as the efficiency of kiln unloading machine. The operator has more time to dedicate to other tasks, less manual unloads, less defects and more safety for the operator himself.

# INTER SER' BACK-WASH STATION

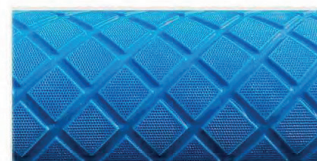

THE GROWING PRODUCTION TREND IN CERAMIC INDUSTRY, INCREASINGLY ORIENTED TOWARDS THE LARGE FORMAT AND SLABS, HAS TURNED THE APPLICATION OF REFRACTORY ENGOBE INTO A STAGE OF FUNDAMENTAL IMPORTANCE, THAT CAN MAKE THE DIFFERENCE ALSO IN TERMS OF EFFICIENCY AND PERFORMANCE OF THE PLANTS.

ROLLERPRESS is a silicon engraved roller used to replace the traditional SPINGUM pipe, it allows to easily but efficiently solve the most common problems related to engobe application.

Totally customizable to print logos or writing "Made in...",  
Some of the ROLLERPRESS engravings:

STANDARD ENGRAVING

CUSTOMIZED B - ROMBI

STANDARD WITH LOGO

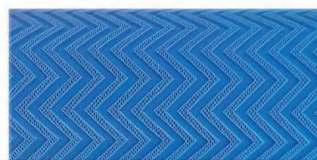

CUSTOMIZED C - VITE LARGA

HONEYCOMB

CUSTOMIZED D - WEB

RELIEF

CUSTOMIZED E - VITE 1-1

CUSTOMIZED A - VITE FINE

CUSTOMIZED F - NUMBERS
