interser
original parts. global performance.

For more than 30 years, Inter Ser has been an international reference in the field of original spare parts for the ceramic industry.

Over time, the company has expanded its role, supporting customers not only through component supply but also by helping improve industrial performance.

Inter Ser has chosen its 30th anniversary as the perfect occasion to refresh and modernize its corporate logo, a symbol of the company's evolution and growth over the years.

This evolution is reflected in the new payoff: **Original Parts**, which highlights the company's strong roots in the original spare parts business, and **Global Performance**, which expresses its ability to analyze processes, identify inefficiencies, and contribute to the optimization of production lines.

The new logo combines tradition and innovation, celebrating 30 years of experience while representing Inter Ser's future vision as a global partner for industrial efficiency and development.

Since 1996, alongside ceramic manufacturers worldwide.

Inter Ser supports the international ceramic industry with original spare parts, equipment and dedicated solutions, contributing to the continuity, reliability and evolution of plants.

Since 1996, alongside ceramic manufacturers worldwide.

01 1996

The insight.

Piero Zanoni, after a long experience in the leading companies of the ceramic sector, identifies a need still not fully covered in the after-sales support of plant manufacturers.

Thus Inter Ser is born, with a clear mission: to support ceramic manufacturers in identifying and supplying original, reliable and correctly matched spare parts.

02 THE 2000S

International growth.

Inter Ser progressively consolidates its presence in foreign markets, becoming a reference point for many of the world's leading ceramic manufacturers.

Over time, the company builds a distinctive role as a link between the Italian ceramic district, the manufacturers, the local mechanical excellences and the international production plants.

03 SINCE 2015

Technical evolution.

The supply of original spare parts is progressively complemented by the development of equipment, special machinery and technical solutions made with selected partners from the Sassuolo district.

Strategic collaborations arise with specialized companies such as I-TECH and FIMO, strengthening Inter Ser's ability to support customers not only in supply but also in the technical evolution of their lines.

04

Today.

Inter Ser continues to base its identity on original spare parts, but its value today goes beyond the availability of the single component.

Through the experience gained on ceramic lines around the world, the constant observation of operational needs and the ability to recognize recurring criticalities, Inter Ser supports customers in the technical management of production continuity.

Mission.

To guarantee continuity, reliability and evolution to ceramic lines worldwide, providing original spare parts, technical expertise and targeted solutions based on real knowledge of the plants and their operating conditions.

Every day we support ceramic manufacturers in identifying the right component, reducing technical risk and turning production needs into precise, reliable and sustainable answers over time.

Vision.

To be the global reference for the ceramic industry in protecting production continuity, combining the solidity of original spare parts with the ability to understand, interpret and improve line performance over time.

We want to bring the best of Italian technical expertise to the world, consolidating Inter Ser's role as a strategic partner for the stability, efficiency and evolution of ceramic plants.

The people behind every answer.

Gian Luca Zanoni CEO

A management engineer, he has contributed to the international development of the Inter Ser model, adapting it to the needs of different markets and strengthening the company's presence in the world's main ceramic districts.

Since 2024 he has been a member of ACIMAC's Board of Directors.

Paolo Zanoni CEO

A mechanical engineer, he leads the company's technical evolution, complementing the historical core of original spare parts with the development of equipment, special solutions and targeted interventions to improve the lines.

SASSUOLO

Three offices, a single operating standard.

HEADQUARTER

Vercelli

Italy

Management, sales, back office, export and administration. From here we coordinate international activities and customer relations in the world's main ceramic markets.

LOGISTICS

Sassuolo

Italy

In the heart of the Italian ceramic district, we manage the warehouse, shipments and operational relations with the technical and mechanical partners of the area.

Proximity to the district allows us to operate with speed, precision and direct access to one of the world's most qualified industrial ecosystems in ceramic technology.

MÉXICO

Chihuahua

México

A direct presence in the Mexican market, designed to be closer to customers, understand their operational needs and ensure support in a strategic area for the global ceramic industry.

The strenght of the Italian ceramic district at the service of the world.

Inter Ser was born in the unique industrial ecosystem of Italian ceramic technology.

From this territory we inherit mechanical precision, technical culture, adaptability and attention to detail. However, our value is not limited to exporting Italian products.

Our task is to turn this expertise into production continuity for customers all over the world.

Technical expertise

We know the components, lines, criticalities and operational dynamics of the ceramic industry.

Flexibility

Every plant has its own story. That's why we work on real needs, avoiding standardized answers.

Reliability

Every request is handled responsibly, because a wrong component or a delay can have significant consequences on production.

Global vision

We operate in over 60 countries, with the ability to adapt our intervention to different markets, plants and production contexts.

A recognized role in the ceramic industry.

In October 2021, Inter Ser joined ACIMAC – Italian Association of Manufacturers of Ceramic Machinery and Equipment.

ACIMAC gathers more than 100 companies, mainly located in the district of Sassuolo (MO), a sector that has contributed over the years to spread all over the world the Italian technology and playing, nowadays, a worldwide leadership role.

Sustainability Report ENVIRONMENT, PEOPLE, AND GOVERNANCE.

In 2025, we prepared our first Sustainability Report, a tool that transparently communicates our commitment to responsible growth by measuring results and objectives across the main ESG areas: environment, people, and governance.

ESG Rating

ENVIRONMENT, SOCIAL, GOVERNANCE

The acronym literally corresponds to Environmental (environmental area), Social (social area), and Governance (corporate governance area). Environmental, social, and governance factors are those that qualify an activity as sustainable.

Legality Rating

TRANSPARENCY AND LEGALITY

This certification is the tangible result of our unceasing commitment to operate with transparency, ethics and respect for market rules. It's the proof of our dedication to create a working and business environment that meets the higher standards.

Insurance Rating

FINANCIAL SOLIDITY

The insurance rating identifies the proper insurance coverage, according to different parameters, that have to be necessarily found in the company, for in the absence of this the risk is having to completely or partially stop the activity. The recognition received confirms the excellent risks coverage level of our company.

Packaging and delivery.

Strategic Location

Our warehouse and logistics headquarters are located in Sassuolo, at the heart of the ceramic district.

Sustainable Facility

The facility is equipped with photovoltaic panels, making us energy self-sufficient, and incorporates all the necessary technologies to obtain green certifications for reducing environmental impact.

Global Shipping Hub

All shipments to the over 60 countries worldwide where we operate originate from our Sassuolo warehouse.

30 Years of Experience & Quality Control

Inter Ser, thanks to its thirty years' experience, can ensure great attention to packaging and shipping operations. We check every single spare part and test all the machine before shipment.

Premium Packaging

We always use high quality boxes, for heavy loads, fumigation compliant according to IPPC/FAO International, ISPM No. 15, as it is essential to ensure the integrity of goods during transport operations.

Reliable Value for Our Customers

The great care with which we handle the packaging, the quality control and the delivery of goods, is a surplus value on which our customers can always count.

Advanced Warehouse & Logistics

To further implement warehouse management and operational logistics, we have equipped our logistics Headquarters, in Sassuolo, with MODULA automatic vertical warehouses which, thanks to the connection with a WMS (Warehouse Management System) software, allows to control, coordinate and optimize all movements automatically. This fast and accurate system allows us to stock a lot of consumable spare parts that will be always ready for immediate shipment.

Extensive Experience in Customs Procedures and International export Management

30 + YEARS OF INTERNATIONAL EXPERIENCE

We have been successfully operating in international markets for over 30 years, building extensive experience in export documentation and invoicing for customers worldwide.

TRAINED & QUALIFIED TEAM

Continuous training in customs and international trade ensures full compliance with regulations and customers' specific requirements.

AUTHORIZED EXPORTER STATUS

Our customers benefit from reduced import duties on goods of European preferential origin.

APPROVED LOCATION

Our Sassuolo warehouse is recognised by Italian Customs, allowing us to carry out customs procedures in-house quickly, efficiently and securely.

REX REGISTERED – FROM JUNE 2026

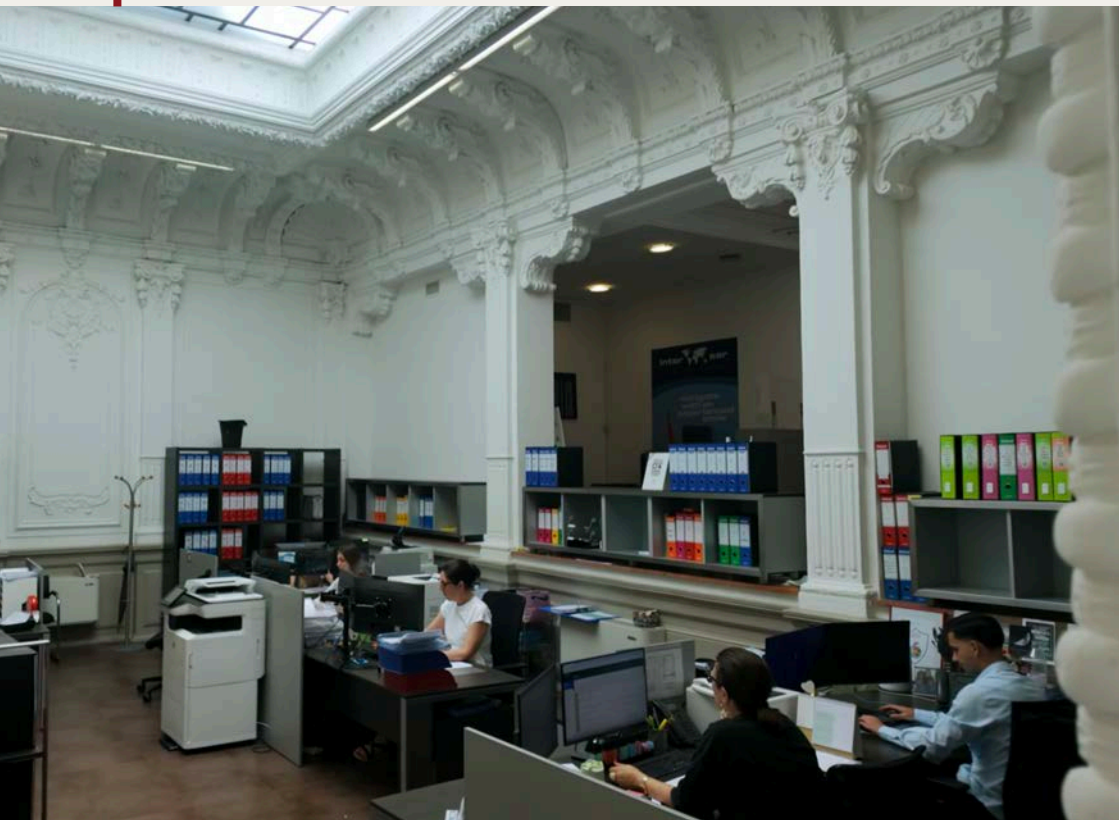

MERCOSUR customers benefit from additional customs duty reductions on goods of European preferential origin.

PARTNERSHIP & ONGOING SUPPORT

We work daily with freight forwarders and import managers, providing assistance throughout every shipping stage until final goods delivery.

ADDED VALUE FOR OUR PARTNERS

A reliable international partner managing every documentary and customs-related aspect of imports.

Fast, optimized deliveries, everywhere.

01 Sea and air shipping

We choose the most efficient mode for each destination, balancing costs and delivery times.

02 Worldwide groupage

We consolidate shipments to reduce customers' purchasing and administrative costs.

03 Custom industrial packaging

We protect spare parts and components with packaging suited to every destination and transport mode.

04 First reply within 48 hours

Responsiveness to every request, in any time zone.

A presence built country by country.

Inter Ser supports the international ceramic industry, exporting from the Italian district to over 60 countries across every continent.

Our strength comes from integrating three elements: original spare parts, technical expertise and a widespread presence that lets us respond quickly wherever the customer is.

Today we are partners to 24 of the 25 largest ceramic manufacturers in the world: confirmation of the role we have built over time as a reference for production continuity.

A network across every continent.

The trust of industry leaders

Partner to 24 of the 25 largest ceramic producers in the world.

A direct presence where it matters.

Inter Ser de México
SUBSIDIARY SINCE 2005

In addition to the sales network covering international markets, in Mexico we operate through a dedicated subsidiary.

Since 2005, Inter Ser de México has served the Mexican market with its head office and central warehouse in Chihuahua and an operational network across the country.

The same Italian standard, in every country.

Everywhere in the world we bring the expertise of the Italian ceramic district: original spare parts, technological solutions and responsive service, grounded in the Group's values.

Why choose original spare parts

A non-original spare part can cost up to 10 times more in the long run due to unexpected machine downtime and premature wear of adjacent components.

Precise identification

We reconstruct the component's identity even without complete documentation.

Full traceability

Every spare part is documented: supplier, batch and full compliance with OEM standards.

Full responsibility

A single expert point of contact to handle the entire complexity of your machine fleet.
